Rapid Care and Management of Anaphylaxis in OR

Gabriel Rodriguez, MD, (Krystal Weierstahl, DO)
Midwest Anesthesia Residents Conference
April 13, 2019
Case – 42 YO M with ESRD on HD

- Induction
- Site preparation
- Antibiotic
Hallmarks of Anaphylaxis

Common Triggers

Clinical diagnosis!
Initial Management

Rapid Interventions:
• Get more help!
• DC/remove potential triggers
• ”ABCs”
• Medications
• Labs
• Rule out other etiologies
Secondary Management:

- Continue surgery?
- Admission?
- Allergy specialist referral
Learning points

• Recognize key features of anaphylaxis in anesthetized patients.

• Administer epinephrine promptly for suspected severe anaphylaxis.

• Obtain serum tryptase to support anaphylaxis diagnosis and future evaluation.
